Features:

- Choose from poly or fabric seats and backs.
- A waterfall edge for unrestricted circulation.
- Distinct back curvature provides exceptional lumbar support and comfort.
- The back flexes for greater comfort. (The seat is hung from the lower back such that the user's weight counterbalances the back tilt.)
- Seats and backs are field replaceable for extended service life.
- To provide exceptional structural support for the seat, two die-formed 7-gauge straps are welded to the frame beneath the seat.
- High density stacking capabilities.
- Frame available in chrome or in powder coated black.
- Dolly (shown) easily transports up to 25 chairs (70" high)
- Tablet arm (shown) optional

Seat Dimensions: 18.25"w x 17.5"d

Dakota

Polypropylene

The Dakota molded chair offers durability and versatility at an affordable price. It works in training rooms, lounges, cafeterias, auditoriums or in any application where flexibility and resistance to wear is required of a high-density stack chair.

The polypropylene shell cleans easily, making the Dakota particularly appropriate for the healthcare environment. Molded chairs stack 45 high and are available in a variety of colors.

The chair frame is sturdily constructed of a 7/16" solid steel rod that can be finished in bright duplex nickel chrome plating or electrostatically applied epoxy.

Navigator

If you had to pick one word to describe Navigator Seating, it would probably have to be versatility.

With its sturdy four-leg design and articulating back, Navigator Seating provides your guests with a high degree of ergonomic comfort. But that's only the beginning. It also allows users to fold up the seat and nest several chairs together... then collectively move them to where they need to go.

The Navigator is a natural for conference or training rooms when you don't always know exactly how many people will be attending. With the Navigator you can quickly roll out extra stored seating as needed.
